Ms. Wellman:

In response to your request for additional information on the Atlantic Coast Pipeline project, dated September 30, 2015, Atlantic is submitting the following:

1. *Maps of the Chesapeake Bay Resource Protection Areas as described in the coastal lands management enforceable policy analysis as well as known access road locations.*
The attached map covers the AP-3 lateral and the mapped Resource Protection Areas as they are the only CBPA features on the ACP project.
2. *Clarification of whether there will be two different locations or one location for above-ground facilities at the end of the proposed lateral line in the City of Chesapeake. The topographic maps submitted to FERC and available on the Dominion website indicate that there will be two separate locations for the M&R Station and the L&R Site 7 in Chesapeake. The topographic maps submitted as part of the FCC indicate there is one proposed location for an above-ground facility.*
There is only one proposed location for the Elizabeth River M&R Station which will include the launcher and receiver. An off-site temporary staging area is being evaluated on a portion of the site identified as Site 7. The discrepancy between the mapping products will be corrected.
3. *Clarification on whether there is a proposed valve site (#30) between miles 74 and 75 as indicated in the FERC application or no valve site as indicated on the maps that were submitted with the FCC.*
Valve site #30 is located between mileposts 74 and 75 and I have included a graphic of the area for your files.

Please feel free to contact me with any additional requests or comments.

Respectfully,
Sandy Williams, PWS
